Agenda

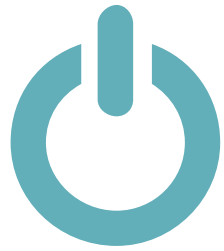

- **JavaScript Development with WebStorm**

- Coding in JavaScript
- Code Navigation
- Language Injection
- Debugging
- Creating Live Templates
- Using CoffeeScript and TypeScript
- Debugging with Meta Languages

demonstration

CODING IN JAVASCRIPT

demonstration

CODE NAVIGATION

USING COFFEESCRIPT AND TYPESCRIPT

demonstration

DEBUGGING META LANGUAGES

Summary

■ JavaScript Development with WebStorm

- WebStorm has sophisticated tools for helping you save time while coding JavaScript
- You can navigate and refactor your code in smart ways in WebStorm
- The ability to use small versions of languages within JavaScript make writing inline code easier
- The debugging experience in WebStorm requires browser plugins but works in smart ways
- Creating your own Live Templates to simplify monotonous tasks
- WebStorm isn't limited to JavaScript, you can use other meta languages like TypeScript and CoffeeScript
- You can even debug using these meta languages in WebStorm
