Agenda

- **AngularJS and WebStorm**

- Getting Started
- Writing Controllers
- Using Routing
- Data Binding
- Directives

demonstration

GETTING STARTED

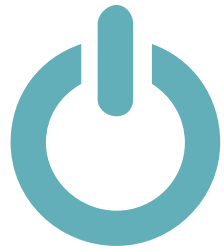

demonstration

WRITING CONTROLLERS

demonstration

USING ROUTING

demonstration

MORE DATA BINDING

demonstration

WRITING DIRECTIVES

Summary

- **AngularJS and WebStorm**

- You can use local or CDN versions of AngularJS with WebStorm
- Code completion works across all parts of AngularJS including directives, controllers, binding and more...
- Refactoring of AngularJS elements works throughout the AngularJS stack
- AngularJS routing is aided with simple live templates to quickly create routes
- Code completion works throughout the data binding stack too
- When writing custom directives, WebStorm supports refactoring, case switching and restrictions
