hardcore developer training

Module 5

Module 5

- **Working with Cookies**

Module 5

- **Working with Cookies**
- **Working with Sessions**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**
- **Error Handling**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**
- **Error Handling**
- **Using *express* to create Express Applications**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**
- **Error Handling**
- **Using *express* to create Express Applications**
- **Using *WebStorm* to create Express Applications**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**
- **Error Handling**
- **Using *express* to create Express Applications**
- **Using *WebStorm* to create Express Applications**
- **Using *WebStorm* to debug Express Applications**

Module 5

- **Working with Cookies**
- **Working with Sessions**
- **Extending functionality with custom middleware**
- **Authentication and Authorization**
- **Error Handling**
- **Using *express* to create Express Applications**
- **Using *WebStorm* to create Express Applications**
- **Using *WebStorm* to debug Express Applications**
- **Summary and next steps**

Summary and next steps

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express
- **Database Support**
  - MS SQL
  - CouchDB
  - PostgreSQL
  - Redis

Summary and next steps

- **Express.js Samples**

  - https://github.com/visionmedia/express

- **Database Support**

  - MS SQL

  - CouchDB

  - PostgreSQL

  - Redis

- **Socket.io**

  - Real-time support

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express
- **Database Support**
  - MS SQL
  - CouchDB
  - PostgreSQL
  - Redis
- **Socket.io**
  - Real-time support
- **Search on npm.org before you re-invent the wheel**

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express
- **Database Support**
  - MS SQL
  - CouchDB
  - PostgreSQL
  - Redis
- **Socket.io**
  - Real-time support
- **Search on npm.org before you re-invent the wheel**
- **Express is Lightweight Framework and Fast to work with**

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express
- **Database Support**
  - MS SQL
  - CouchDB
  - PostgreSQL
  - Redis
- **Socket.io**
  - Real-time support
- **Search on npm.org before you re-invent the wheel**
- **Express is Lightweight Framework and Fast to work with**
- **Testing is not optional**
  - Mocha

Summary and next steps

- **Express.js Samples**
  - https://github.com/visionmedia/express
- **Database Support**
  - MS SQL
  - CouchDB
  - PostgreSQL
  - Redis
- **Socket.io**
  - Real-time support
- **Search on npm.org before you re-invent the wheel**
- **Express is Lightweight Framework and Fast to work with**
- **Testing is not optional**
  - Mocha
- **JavaScript can get messy**

Thank you!
